THE FABRIC OF OUR LIFE

Since 1992, True North Gear has invested into the research, design, testing and manufacturing of durable and innovative clothing and gear that su the wildland and structure markets.

Over the years, we have stayed true to our heritage of seeking out and harnessing user feedback to create new design solutions or upgrade existing ones. We provide the pinnacle in performance through a design philosophy that embraces durability, comfort, and protection as inclusive elements. Designing and delivering dependable products is essential to the vitality of our organization and our overarching mission to support and protect a customer base that operates in life-risking environments every day.

Committed customer service and a lifetime material warranty on all products further distinguish our customer-driven focus.

- + Well-tailored yet roomy enough for easy movement

Sizes: S-3XL
Fabric: Nomex® 6.0 oz/sq. yd FR fabric

PLUS VS. PRO

WHICH FABRIC IS BEST FOR YOU

DUAL FABRIC OFFERINGS IN TRUE NORTH WILDLAND

There are a variety of different jobs within Wildland Firefighting that each requires their own unique skill sets. Because of the varying nature of the specific duties, firefighters will have different equipment variations, and sometimes PPE, that better suits his or her position on the fire line.

We've applied this same concept to our NFPA 1977 certified wildland clothing with the Plus and Pro fabric options. We understand that each firefighter has different needs, whether it be durability, cost efficiency,

comfort, or perhaps a combination of it all. Each fabric option carries a unique feel and characteristics that make it ideal for specific types of jobs in wildland firefighting. We want to ensure that every firefighter finds the perfect garment that fits their comfort and durability needs while staying within budget.

Each fabric option carries its own unique feel and characteristics.

PLUS FABRIC

TECASAFE® FR FABRIC
5.8 oz/sq. yd (Shirt) • 7.0 oz/sq. yd (Pant)

PRO FABRIC

NOMEX® FR FABRIC
6.0 oz/sq. yd (Shirt & Pant)

MEN'S WILDLAND PANT

Designed with multiple storage options for your gear, this pant is the perfect blend of comfort and functionality.

WOMEN'S CLOTHING

NFPA 1977 certified wildland clothing that allows for women to work hard and do it comfortably.

BUILT BY WOMEN FOR WOMEN

TRUE NORTH® BRUSH SHIRT (PLUS)

- + A full size has been added in the hips
- + Waist darts incorporated for garment shaping purposes
- + Traditional chest pockets have been strategically placed between where the pack waistbelt and harness lay on the garment for functionality and comfort
- + Hook and loop closure allow for an adjustable fit
- + Adjustable collar that can be worn up or folded down and secured
- + Lightweight, breathable fabric for optimal moisture management

Sizes: XS - 2XL
Fabric: Tecasafe® 5.8 oz/sq. yd FR fabric

TRUE NORTH® WILDLAND PANT (PRO)

- + Tru-Fit™ micro-adjustable waist band for a custom fit
- + Designed to fit the natural waistline
- + Tailored with extra room in the hip and thigh areas for ease of movement
- + Cargo pockets are raised higher on the leg to prevent chafing
- + Fully adjustable ankle straps to keep dirt and embers out
- + Extra large gusseted cargo pockets that can be easily accessed with one hand

Sizes: XS - 2XL; 30, 34 Inseam
Fabric: Nomex® 6.0 oz/sq. yd FR fabric

The fire service has seen an exponential growth of women over the last decade. As a result, our designers spent a significant amount of time at the drawing board to create garments that meet NFPA 1977 requirements and are also comfortable enough for the demanding environments that wildland firefighters face on a daily basis.

Aside from being a male-dominated industry with few options for women’s clothing, designing the clothes around the NFPA 1977 standard posed a unique challenge for fit and comfort. While staying within the guidelines, our design team focused on three main components: the hips, waist, & garment length.

It comes as no surprise that men and women have different body structures, and the protective clothing worn needs to reflect these differences. For instance, one radical design departure in the shirt is the lower placement of the pockets which creates more room in the chest. Additionally, the pant allows women to wear them at the hips, or wear them higher at the waist with sizing that adjusts up to 3 inches.

“I love that it’s a slim fit but allows me to have a good range of motion when I am moving around.”

WOMEN IN FIRE

WILDLAND PACKS

Durable fire packs of all sizes built with True North’s patented suspension technology and harness systems.

GIVING BACK

Our partnership with 1% for the Planet

With our ongoing membership with 1% for the Planet, a non-profit organization that inspires individuals and businesses to support environmental solutions, we have chosen to support American Forests as our partner. American Forests focuses on protecting and restoring healthy forest ecosystems in various ways through its Releaf Program. True North Gear’s efforts in collaboration with American Forests will help expand and restore numerous

forests across the United States, including intentional replanting in areas that have been devastated by wildfires. The way we support these efforts is that 1% of all sales from True North products will go to supporting their mission. Every dollar we donate means a new tree is planted in areas like Northern California, the Colorado Rockies, Ozarks, and Rio Grande Valley; All places that are meaningful to our customers and the areas they protect.
