

DragonWear

DRIVEN BY INNOVATION

Our DragonWear® fabrics are inherently flame-resistant, rigorously tested, and pass relevant industry certifications. We use advanced proprietary fabric technology in support of our design philosophy that durability, comfort and protection are inclusive elements. Our products offer the ultimate level of breathable, moisture-wicking performance without sacrificing durability, warmth or comfort.

THE CLOTHES YOU LIVE IN

From the very beginning, we have focused on innovative, reliable products supported by our lifetime warranty. We pride ourselves on unparalleled customer service. The insight we've gleaned from decades of customer feedback has shaped us into the company we are today. We believe that the best product is

the one that is always dependable and keeps the worker protected – this is always at the heart of how we design products that meet these criteria. That is why at DragonWear we make the clothes you live in.

MORE THAN MEETS THE EYE

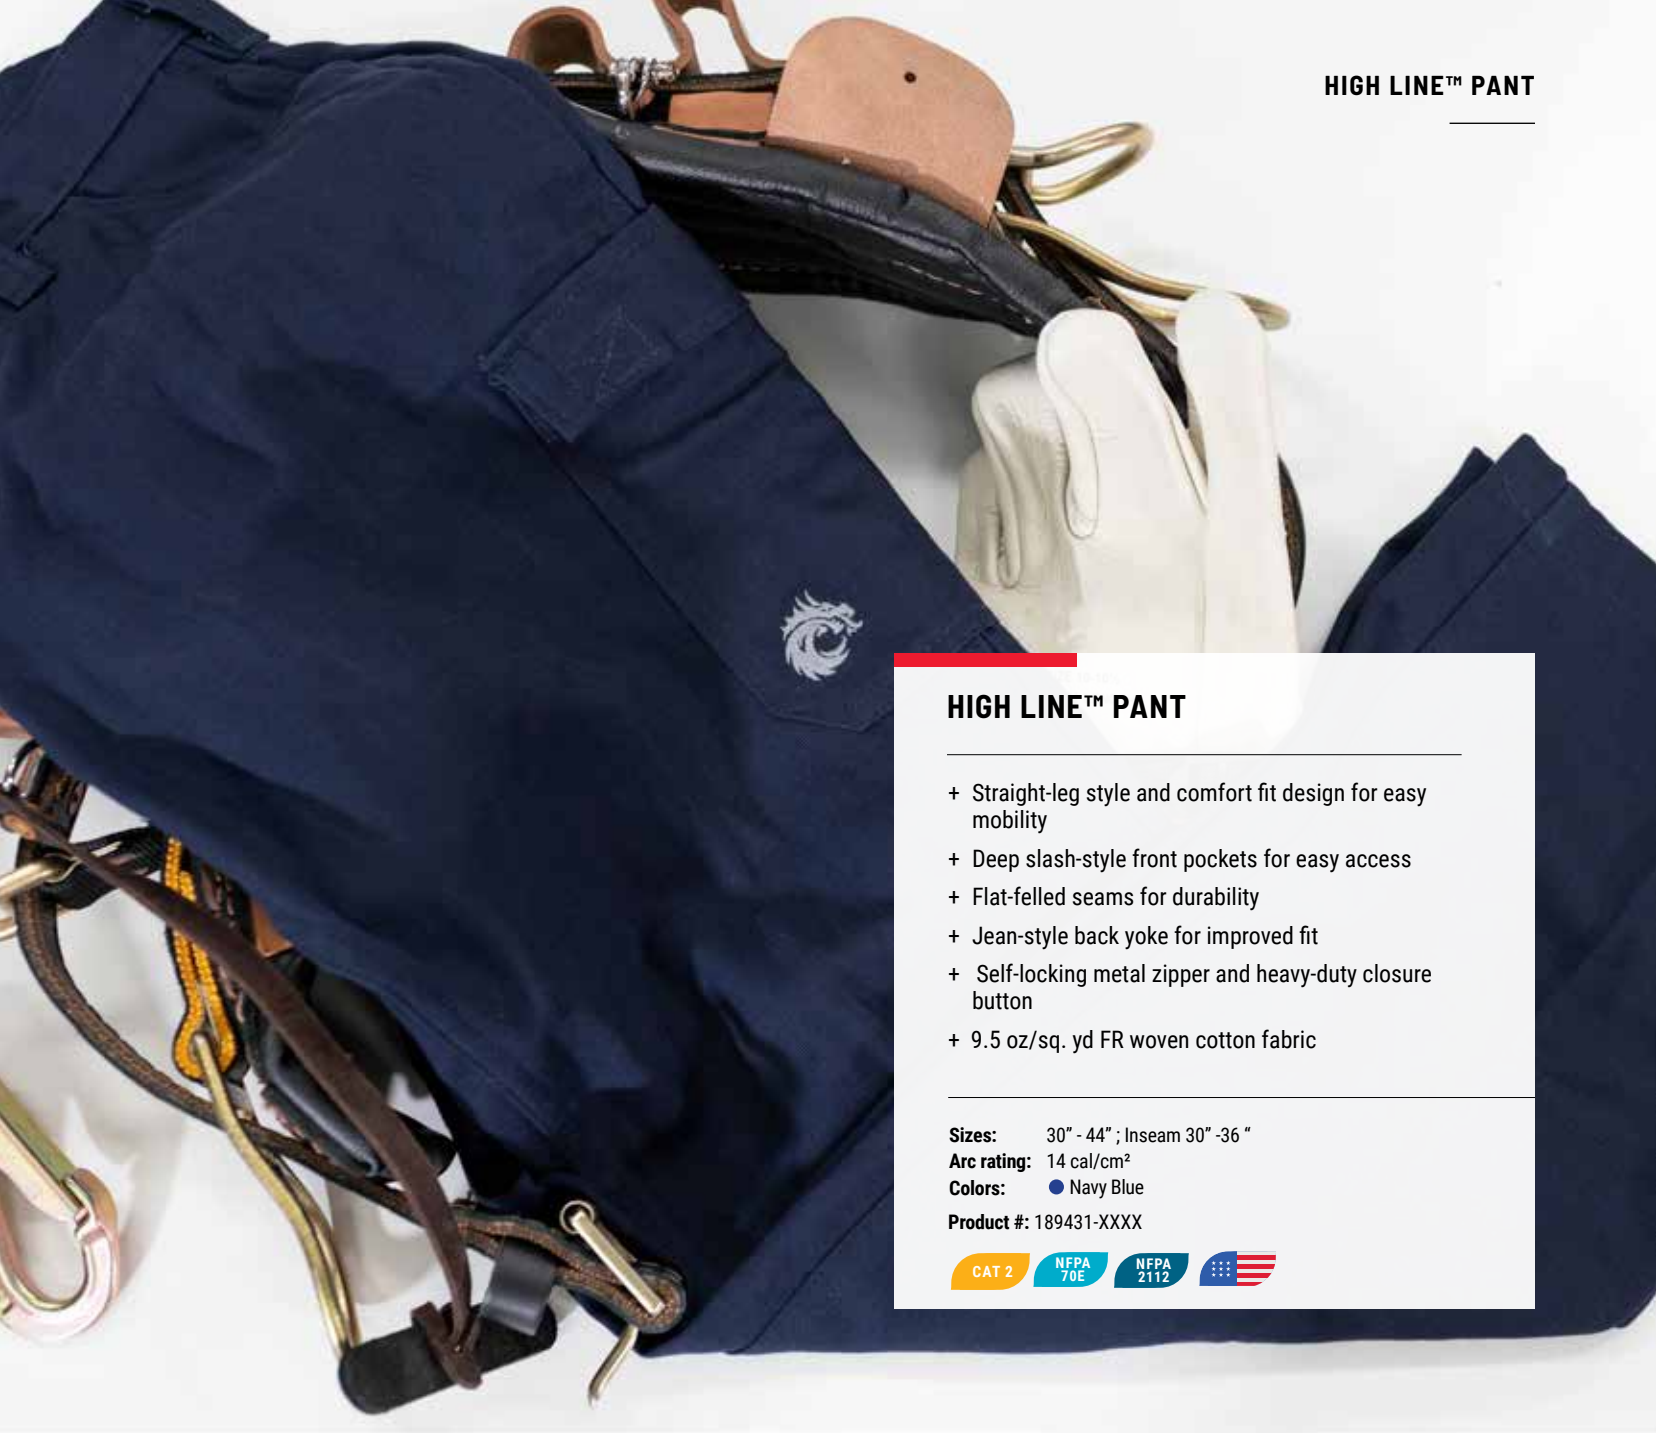

Have you ever heard that cloudy days can pose just as much risk of sunburns as days where the sun is shining bright? Just because you can't see the sun doesn't mean it's not there. UV rays that cause burns are still in the atmosphere and hitting our skin like they would on a sunny day. UV rays are an invisible threat to workers who spend a large portion of their days outdoors in more extreme temperatures. And many people forget to take precautions while outdoors as it just becomes routine. Fortunately, similar to UV rays, there is more to Pro Dry® Tech than what meets the eye. The Pro Dry® Tech fabric has a CAT 2 rating, meaning it can be worn while on the job and it has built-in UPF 50+ sun protection which is proven to block 98% of harmful UV rays.

NEW

HIGH LINE™ PANT

The High Line™ Pant has an outstanding balance between comfort, protection, and durability, and it looks good on you.

Sizes: 30" - 44" ; Inseam 30" -36 "
Arc rating: 14 cal/cm²
Colors: Navy Blue
Product #: 189431-XXXX

THESE PANTS WERE MADE FOR CLIMBIN’

It’s always been part of our mission to keep the worker as the center focus of every decision we make and every product we produce. Over the years, while attending lineman rodeos and talking to workers in the trade around the country, we always heard one similar request - “do you have any FR pants?” A good pair of work pants is imperative for people moving all day. It can be challenging to wear uncomfortable clothes for long hours, especially in harsher weather. Our first utility-focused pant, the High Line Pant, was developed to provide you a comfortable range of motion and durability.

AVAILABLE NOV. 2021

HIGH LINE™ SHIRT

An FR button-down designed with a modern fit that provides optimal performance and comfort while on the job.

AN FR LAYERING SYSTEM BUILT TO WITHSTAND **ANYTHING**

TOUGH ENVIRONMENTS REQUIRE SPECIALIZED GEAR.

DragonWear built their FR performance workwear platform on the concept of layering, and it all starts with the next-to-skin layer. These garments are made up of hydrophobic and hydrophilic fibers that work together to move moisture away from the skin and push it to the outer surface of the fabric. This helps keep the skin dry and makes it easier for the body to regulate its core temperature; it also protects the worker from severe burn in the event of an arc flash or flash fire due to sweat evaporating at extreme temperatures. The mid layer, which can also be interchangeable with the outer layer in less-harsh weather, acts as the insulating layer that retains body heat. These garments are also typically made to

Layering doesn't only apply to garments, but also to accessories like the Yukon™ Neck Gaiter (pictured on the right). Accessories help to cover any remaining areas of the skin that are exposed to weather and/or potential arc flash/flash fire.

move moisture as it captures what's pushed up from the next-to-skin layer. Lastly, the outer layer component is where a high level of protection and "shielding" comes from, and there are several different types of fabric and material selections for workers depending on the job and weather conditions. The Super Fleece™ platform is a popular choice for combating gusty environments as it has incredibly high wind resistance and warmth, and the Shield™ fabric works well in rainy weather to shed heavier rain and sleet while drying out quickly. Overall, layering FR workwear starts with managing moisture at the base layer for comfort and protection, then levels up with each added layer to protect the worker against varied weather-related conditions, and of course, arc and flash fire hazards.

OUTERWEAR

The ideal mix of warmth, comfort and protection without the extra bulk.

PROPRIETARY FABRICS

EVERY FABRIC TELLS A STORY

Every worker has a piece of clothing in their wardrobe that tells a story. Whether it's something significant from the day they were wearing it or maybe just their favorite, most comfortable piece of workwear, FR clothing is more than a garment that hangs in the closet; it's an identity, armor against the daily battles on the job. It's worn by those who risk their safety to

ensure that we all live a comfortable life. Every proprietary fabric we produce at DragonWear understands this identity and has a purpose in protecting the workers as they perform a variety of tough tasks in harsh environments. And each fabric blend we develop ensures the utmost quality and attention to detail, providing the best quality and protection for workers."

PRO DRY® Highly breathable, lightweight base layer with excellent moisture control

PRO DRY® TECH CAT 2 base layer with built in UPF 50+ sun protection to defy heat

LIVEWIRE™ A comfortable stretch fabric with excellent insulation and performance

HIGH LINE™ A woven FR fabric with the versatility and comfort needed for any environment

ELEMENTS™ Comfort, warmth and stretch that will protect against light rain, wind and sleet

SUPER FLEECE™ Ultra-protective, highly warm fleece fabric that stands up against harsh conditions

PROPRIETARY FABRICS

Pictured:
SUPER FLEECE™ FR

If you haven't already guessed from its name, Super Fleece™ is just like fleece, only better. Super Fleece™ combines the best qualities of fleece including superior wind resistance, excellent body heat retention, and comfort with CAT 4/Arc 40 protection and dual certification so the garments can be worn for a variety of different jobs.

“We’ve created a fabric that features inherent flame resistance that will not melt or drip; a necessity for protection from arc flashes or flash fires.”

Pictured:
PRO DRY® TECH

Pro Dry® Tech is the result of blending the comfort and performance of athletic clothing with FR workwear. 4-way stretch, odor control, and UPF 50+ sun protection are just a few of the benefits.

When working on busy job sites or in low light conditions, workers will wear hi-vis clothing to improve their visibility, and ultimately, safety. At DragonWear, we interpret the need to be “seen” in two different ways; literally, in that workers need high visibility for their safety, and additionally in that it reflects our priority to listen to customer needs and feedback. We see you and we hear you, which is foundational to our mission to provide highly specialized performance workwear for specific jobs and purposes. Because of this, listening directly to the customer has, and always will be, a key factor in the process of developing our clothing.

WE SEE YOU

THE BIG EASY

A high-capacity tool backpack that simplifies the task of loading and hauling your gear to any destination.

BIG EASY™ TOOL BACKPACK

- + 3/4 zip for easy access and front-loading
- + Multiple daisy chains for storing gear and rope lash-on
- + Additional exterior pockets with grommets for drainage
- + Heavy-duty interior mesh pocket with velcro closure
- + Made with 1680 Denier Ballistic Polyester and finished with a waterproof coating
- + *Optional Hip Belt

Size: H: 22" W: 16" D: 11"
Body: 5130in³ (All pockets combined)
Colors: ● Black
Product #: BGB1210

*HIP BELT (OPTIONAL)

Product #: FLHB102

WHY IS IT CALLED THE BIG EASY?

Simply put, because it's big and it's easy to use. The Big Easy™ is large enough to carry your gear to any destination, even those hard-to-reach poles, and loading is a breeze with the suitcase-style 3/4 zip around for front loading. The optional hip belt also adds extra support for line workers who are hauling large amounts of gear or who are simply looking for a more ergonomic replacement to their current gear bag.

HEADWEAR & ACCESSORIES

Beanies with superior warmth that fit under a hard hat and breathable face & neck protection.

STORM™ BEANIE
