RADIO HARNESS COLLECTION

STEALTH™ NFPA 1950

Designed to have the smallest footprint of any radio harness on the market, and is simple, durable and reliable. Whether you are using the KNG P150's or the BKR5000's with the clamshell, this harness will secure any size radio.

SINGLE UNIVERSAL NFPA 1950

Designed to keep your gear secure, organized, and easy to access throughout the day. Whether you are using the KNG P150's or the BKR5000's with the clamshell, this harness will secure any size radio.

DUAL UNIVERSAL NFPA 1950

Designed for those who utilize two radios when communicating with additional resources on scene. From the newly re-designed holster that adjusts for both the width and height of the radios, to the extra storage pockets, this harness allows you to secure everything you need during your shift.

DOZER™ NFPA 1950

Designed for heavy equipment operators to secure their fire shelter and handheld radios to their body to remain comfortable while operating.
